My addition consists of a simple square piece of very good plate glass mirror, set in brass, like the ordinary concave mirror. A second split tube is soldered on close to the tube which exists on all Weiss frontal bands, and a brass rod, the ends of which are bent in opposite directions, at an angle of 45. The mode of using this glass is as follows: The laryngoscope is fixed, as usual, before either the left or right eye. The brass rod is fixed in the tube, beside that which holds the rod supporting the reflector; and my square glass is fixed on the other end, as is very well shown in the engraving. As the angles of incidence and reflection are equal, the mirror may be turned to such...
