RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 170 pages. Original publisher: Washington, D. C. : U. S. Environmental Protection Agency, Office of Water, Office of Research and Development, 2006 OCLC Number: (OCoLC)122660954 Subject: Water -- Pollution -- Toxicology -- United States. Excerpt: . . . Framework for Developing SABS Water Quality Criteria U. S. EPA classification of waterbodies, measurement of SABS, and measurement of effects. Then criteria are selected in an analytical fashion that is scientifically defensible. The criteria are linked to human values and are readily understood by a lay audience. No single study or analytical method is used or recommended. Rather, the Framework consists of a step-wise process that allows for the integration of information from different data sets and different perspectives, thereby increasing confidence in the criteria. Several appropriate technical aspects to the Framework are discussed, including measures taken within the water column (e. g. , Secchi depth, turbidity, suspended sediment concentration, and total suspended solids), within bedded sediments (e. g. , percent of fine sediments by extent or composition at depth), and within the waterbody environment (channel, shoreline, and bathymetric measures). Indicators of designated use...
