Pages Number: 256 Publisher: China University of Mining Publishing Club Pub. Date :2010-08-01. structural mechanics (with problem sets). points on the two volumes. a total of fourteen chapters. Is based on the book content. a total of ten chapters. and its main contents are: Introduction. flat bar system. the geometric composition analysis. statically determinate beams and statically indeterminate frame. arch and cable structure statically determinate. statically indeterminate truss and composite structures. virtual work principle and structure of the bar displacement calculation. force method. displacement method. asymptotic methods. influence lines and its application. And Structural Mechanics (Vol.1) (with problem sets). supporting the Structural Mechanics Problem Set also published by the China University of Mining. Structural Mechanics (Vol.1) (Supplementary Problem Set) can be used as professional colleges on undergraduate civil engineering materials. but also for civil engineering professionals and technical personnel and other related information. Contents: Introduction Chapter One Section of Structural Mechanics II objects and tasks of the calculation of the structure diagram of the structure III classification of plane frame structure of load Chapter IV pole system of plane geometric composition of the first geometric composition analysis section several concepts related to the calculation of plane frame section II. III degrees of freedom of the geometric plane frame system composed of geometric composition rules of Section IV and application of section V of the structural analysis of the geometric properties of the composition and static Chapter statically determinate beams and statically indeterminate frame section I beam the internal forces analysis of rod single-span beams with Section II Section III Section IV multi-span beams with V less statically determinate plane frame support seeking or not seeking Block structure of...
