Reviews

Unquestionably, this is the greatest operate by any article writer. I could comprehended everything out of this written e ebook. Your way of life span will be transform as soon as you total reading this book.

(Andy Erdman)

ENERGY AND AGRICULTURE

Book Condition: New. Publisher/Verlag: Springer, Berlin | Energy and agriculture are both extremely broad subjects and their interactions - the subject of this book - cover almost the full spectrum of the agricultural sciences. Yet the subject is a relatively new one whose importance first received widespread recognition barely a decade ago, following the dramatic increase in oil prices during 1973. The impact of this increase was such as to promote a world-wide debate on the future direction that agriculture should take. This debate was, and is, of particular concern in countries where agriculture plays a leading role in economic and social development. During the last half century many national agricultural systems have been transformed from almost closed, self-sufficient systems with few locally produced inputs geared to satisfy local requirements, to intensive, open systems, utilizing large quantities of energy-rich inputs such as fossil fuel for manufactured agro-chemicals, water distribution and imported animal feedstuffs to produce a range of sophisticated products, often for export, which in turn require many energy-rich inputs for their marketing. This industrialization of agriculture has proved to be very successful in many respects and indeed was accepted as a general model for agricultural development allowing increased productivity and efficiency per unit land, labor and water, even in areas with limited natural resources. | 1 Introduction to the Role of Energy in Agriculture.- 1.1 Definition and Scope.- 1.2 Energy Analysis and Agriculture.- 1.3 References.- 1 Principles and Processes.- 2 Economic Impacts of Energy Prices on Agriculture.- 2.1 Introduction.- 2.2 Resource Prices and Technologies of Agriculture.- 2.3 Energy Prices Impact.- 2.3.1 Developed Countries.- 2.3.2 Developing Countries.- 2.4 Increased Energy Prices.- 2.5 Expected Future Impact of Energy Prices.- 2.6 Income Redistribution.- 2.7 Time Flexibility in Food Production.- 2.8 Research Induced by Resource Endowments and Prices.- 2.9 References.- 3 Energy Analysis...
